Preface

This year the 9th WSEAS International Conference on COMPUTATIONAL INTELLIGENCE, MAN-MACHINE SYSTEMS and CYBERNETICS (CIMMACS '10) was held at the University of Los Andes, Merida, Venezuela, December 14-16, 2010. The conference remains faithful to its original idea of providing a platform to discuss neural networks, algorithms, time series analysis, neuro-fuzzy systems, fuzzy sets, simulation, modeling and control, prediction and model identification, data analysis, signal processing etc. with participants from all over the world, both from academia and from industry.

Its success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

The accepted papers of this conference are published in this Book that will be indexed by ISI. Please, check it: www.worldses.org/indexes as well as in the CD-ROM Proceedings. They will be also available in the E-Library of the WSEAS. The best papers will be also promoted in many Journals for further evaluation.

A Conference such as this can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.

The Editors

Table of Contents

Plenary Lecture 1: Current Trends on Command, Control, Modeling and Simulation of the Induction Machines	12
<i>Marcel Ionel</i>	
Plenary Lecture 2: Approaches to Fuzzy Modeling and Control of Dynamic Processes	13
<i>Eliezer Colina Morles</i>	
Optimized Fuzzy Variable Structure Controller for a Pneumatic Fine Positioner	15
<i>Alexander Molero, Miguel Strefezza</i>	
Multirate Depth Control of an AUV by Neurocontroller for Enhanced Situational Awareness	21
<i>Igor Astrov, Andrus Pedai</i>	
Mathematical Model and Simulation for a Helicopter with Tail Rotor	27
<i>Tulio Salazar</i>	
Mining Regions of Remote Sensing Images	34
<i>Jules-Raymond Tapamo, Rowan Titlestad, Serestina Viriri</i>	
Technical Interactions between Distributed Photovoltaic Systems and Low-Voltage Grids	39
<i>Traian Daniel Ivanovici, Marcel Ionel, Mihail-Florin Stan, Valentin Dogaru-Ulieru, Ioan Corneliu Salisteanu</i>	
Advanced Control Techniques and Parameters Determination of AC Electrical Machines	44
<i>Marcel Ionel, Mihail-Florin Stan, Ivanovici Traian, Octavian-Marcel Ionel, Elena Otilia Virjoghe, Diana Enescu</i>	
Strategies for Increasing Energy Efficiency in Electrical Drives	54
<i>Marcel Ionel, Mihail-Florin Stan, Ivanovici Traian Daniel, Diana Enescu, Elena Otilia Virjoghe, Octavian-Marcel Ionel</i>	
Finding Temporal Associative Rules in Financial Time-Series: A Case of Study in Madrid Stock Exchange (IGBM)	60
<i>Conti Dante, Martinez De Pison Francisco J, Pernia Alpha</i>	
Temporal Association Rules Mining: A Heuristic Methodology Applied to Time Series Databases (TSDBs)	69
<i>Conti Dante, Martinez De Pison Francisco J, Pernia Alpha</i>	
Conceptual Modeling of Emergent Processes in Dynamic Complex Systems	75
<i>Nelson Fernandez, Jose Aguilar, Oswaldo Teran</i>	
The Verification Method of MASOES Applied to the Social Force Model for Pedestrian Dynamics	83
<i>Niriaska Perozo, Jose Aguilar, Oswaldo Teran</i>	
Dynamic Semantics Ontological Framework for Web Semantics	91
<i>Taniana Rodriguez, Jose Aguilar, Eduard Puerto</i>	

FPGA Prototyping of Neuro-Adaptive Decoder <i>Cecilia Sandoval Ruiz</i>	99
Estimation of Odds Ratios in Logistic Regression models under Different Parameterizations and Design Matrices <i>Surendra Prasad Sinha, Luis Nava Puente, Elizabeth Torres Rivas</i>	105
Measurement and Analysis of Poverty: The Venezuelan Case <i>Elizabeth Torres Rivas, Gines Guirao Perez</i>	110
Rover Control using an Artificial Vision System <i>Aguirre-Gil Inaki, Amaro Manuel</i>	116
Validation of the Non-Standard Discretization Methods Case of Study: The Simple Pendulum <i>Anna Patete, Maria Velasco, Jesus Rodriguez-Millan</i>	123
Optimization Model based on Genetic Algorithms for Oil Wells <i>Edgar Camargo, Jose Aguilar, Addison Rios, Francklin Rivas, Joseph Aguilar-Martin</i>	131
Towards Formal Specification of the Service in the IEEE 802.16 MAC Layer for Connection Management <i>Ana Veronica Morales Bezeira, Maria Elena Villapol Blanco</i>	140
Principal Component Analysis for Fault Detection and Diagnosis. Experience with a Pilot Plant <i>Thamara Villegas, Maria Jesus Fuente, Miguel Rodriguez</i>	147
Numerical Simulation of a Simplified Conductive-Convective System for 2D Thermal Field Analysis <i>Diana Enescu, Elena Otilia Virjoghe, Marcel Ionel, Mihail-Florin Stan</i>	153
Specific Problems in Programming Multicore Systems <i>Andreea Margineanu, Horia Ciocarlie</i>	159
Automatic Configurator for Application Code <i>Roxana Muresan, Andrei Botoaca, Horia Ciocarlie</i>	165
A Syntactic Specification for the Programming Languages of the IEC 61131-3 Standard <i>Flor Narciso, Addison Rios-Bolivar, Francisco Hidrobo, Olga Gonzalez</i>	171
A Genetic-Algorithm Based Approach for Generating Fuzzy Singleton Models <i>Miguel Ramirez, Eliezer Colina</i>	177
Signature Recognition using Artificial Neural Network <i>Debnath Bhattacharyya, Tai-Hoon Kim</i>	183
Design of Non Accidental Lane <i>Prasun Ghosal, Arijit Chakraborty, Amitava Das, Tai-Hoon Kim, Debnath Bhattacharyya</i>	188
System of Control in an Offshore Wind Farm with HVdc Link <i>Miguel Montilla-Djesus, Santiago Arnaltes, David Santos Martin</i>	193
Implementation of Interactive Home Control System <i>Yangkeun Ahn, Jiman Hong, Youngchoong Park, Kwangsoon Choi, Kwangmo Jung</i>	203

Features and Applications of an Information System Developed for a Sleep Clinic	209
<i>Carlos Rivas-Echeverria, Edgar Acosta, Francklin Rivas-Echeverria, Lizmar Molina, Solange Gonzalez, Racely Sanchez</i>	
Analysis of Stress Due to Contact between Spur Gears	216
<i>Ruben D. Chacon, Luis J. Andueza, Miguel A. Diaz, Jose A. Alvarado</i>	
Requirements and Modeling for a Studies Orientation and Recommendation System (SORS)	221
<i>Marla Corniel, Fidel Gil, Jorge Molero, Jose Ferrer, Ana M. Borges, Leonardo Contreras</i>	
Extended Spatial and Temporal Learning Scale in Reinforcement Learning	227
<i>Hui Zhu, N. Mastorakis, X. D. Zhuang</i>	
Fuzzy Virtual Objects for Real-Time Moving Control of Mobile Robot in Dynamic Environments	232
<i>Hui Zhu, N. Mastorakis, X. D. Zhuang</i>	
Dynamic Programming and Curve Fitting Based Road Boundary Detection	236
<i>Shyam Prasad Adhikari, Hyongsuk Kim</i>	
Architecture of Wireless Supervisory Control and Data Acquisition System	241
<i>Rosslin John Robles, Tai-Hoon Kim</i>	
Modern Information Technologies Used in Market Research	245
<i>Daniela Litan, Aura-Mihaela Mocanu, Stefan Olaru, Anca Apostu</i>	
Study and Modeling of Methylorange Degradation with the Fenton Reaction	251
<i>Orlando Garcia-Rojas, Claudia Gomez-Quintero, Miguel Rios-Bolivar, Abel Romero, Antonio Rodriguez</i>	
Adaptive Algorithm based on Clustering Techniques for Custom Reading Plans	259
<i>Marylin Giugni, Francisca Grimon, Luis Leon, Joaquin Fernandez, Joseph Monguet</i>	
Modeling and Control System for Intelligent Prosthesis Configuration and Testing	265
<i>Adrian Zafiu, Lucian Milea, Orest Oltu, Monica Dascalu</i>	
Software and Hardware for Locomotory Disabled Patients Assisted Training and Prosthetic Solutions Choosing	269
<i>Lucian Milea, Adrian Zafiu, Monica Dascalu, Adrian Barbilian</i>	
Evolution of Integrated Automation Approach	274
<i>Edgar Chacon, Juan Cardillo</i>	
Intelligent Supervision Systems for Improving the Industrial Production Performance in Oil Wells	289
<i>Edgar Camargo, Jose Aguilar, Addison Rios, Francklin Rivas, Joseph Aguilar-Martin</i>

Plenary Lecture 1

Current Trends on Command, Control, Modeling and Simulation of the Induction Machines

Professor Marcel Ionel

Electronic, Telecommunications and Energetically Engineering Department
Valahia University Targoviste, Electrical Engineering Faculty
18-24 Unirii Blvd., 130082 Targoviste
ROMANIA

E-mail: ionel.marcell@yahoo.com

Abstract: AC motor drives have produced and still produce a particular high impact in many technical applications. Advantages of adjusting the frequency of operation can not be fully exploited without adjustment command and control strategies through modeling of the corresponding components. Simulation of drive systems is complicated due to the nonlinear high level that they bring to the power electronics and also due to control, adjustments and protection in the transfer of power flux. Moreover, mathematical models of semiconductor and control functions, which are not yet found in many programs, require from the designer or specialist the introduction of its own version of a simulation program. It is currently known that the use of available multi-level modeling, commonly used to describe static converters and each model, can introduce undesirable effects on the behavior of an electric machine. This lecture presents the current trends of advanced control techniques and control of induction machines used for variable frequency drives, depending on the torque, speed and rotor position. The possibilities of command and control without sensors are analyzed. As well, an estimation of the results obtained by modeling and simulation of the control and an adjustable system are discussed. Finally, in the present lecture recommendations are given about how to run a simulated vector for controlled induction electric machines.

Brief Biography of the Speaker: Dr. Marcel IONEL is actually pro-dean of Electrical Engineering Faculty, Valahia University, Targoviste, Romania. From 2004 to 2008 was the dean of his faculty. Teaching activities: "Electrical and Electronic Measurements" Has an extended expertise on functioning of asynchronous engines, power static converters, electrical energy supplied by photovoltaic systems, etc. Has published over 80 papers and has attended National and International Conferences. He also published 10 books in the field of Electrical Engineering and contributed to the projection and installation of the first system to produce photovoltaic energy in Romania. Actually is working in few international research projects.

Plenary Lecture 2

Approaches to Fuzzy Modeling and Control of Dynamic Processes

Professor Eliezer Colina Morles

Division of Graduate Studies

Faculty of Engineering

Universidad de Los Andes

Venezuela

E-mail: ecolina@ula.ve

Abstract: This talk includes some empirical approaches to fuzzy modeling of physical processes, based on input-output variables measurements. These models may be used to design fuzzy controllers in some feedback control configurations. There will be a reference to the use of fuzzy clustering techniques, such as Gustafson-Kessel and C-means algorithms for constructing Takagi-Sugeno fuzzy type models as well as fuzzy invertible singleton type models, which are appropriated controllers in the Internal Model Control scheme.

The talk also includes some considerations on the design of controllers with fixed and mobile set points for the regulation of some uncertain dynamical systems.

Brief Biography of the Speaker: Eliezer Colina Morles, was born in July 1954 and is a native of Zulia State, Venezuela. He graduated as a Systems Engineer at the University of Los Andes, Merida, Venezuela, the degree of Master of Science in Systems Engineering at Case Western Reserve University, Cleveland, USA and the degree of Doctor of Philosophy at the University Of Sheffield, England. He has held various academic positions, from Instructor in 1979, to Professor today. He has conducted research in the area of Automatic Control Systems, in particular in the fields of Intelligent Control Systems, Supervisory Process Control and Fault Detection and Diagnosis in Dynamic Systems, in which he has published several scientific articles. Likewise, he has served as academic supervisor of many undergraduate, master and doctoral students.

Currently, he serves as Coordinator of the Division of Graduate Studies, Faculty of Engineering of the Universidad de Los Andes, Venezuela.
