Table of Contents

<u>Plenary Lecture 1: Harmonic Identification Algorithms with Applications</u>	10
<i>Sarawut Sujitjorn</i>	
<u>The Proposed 3D Navigation Approach of an Autonomous Mobile Robot</u>	11
<i>Ouarda Hachour</i>	
<u>TMS320F2812 DSP Controller for Dynamic Voltage Restorer (DVR) Application for Improving of a Three Phase Inverter</u>	21
<i>R. Omar, N. A. Rahim</i>	
<u>Subthreshold Current Model for Short-Channel Double-Gate (DG) MOSFETs with Vertical Gaussian Doping Profile</u>	27
<i>Pramod Kumar Tiwari, Sarvesh Dubey, S. Jit</i>	
<u>Controllability of Nonlinear Systems with Multiple Delays</u>	35
<i>J. Klamka</i>	
<u>A Wide Tuning Range Voltage-Controlled Oscillator with Active Inductors for Bluetooth Applications</u>	39
<i>Jenn-Tzey Yang, Shao-Kang Hsieh, Ping-Jung Tsai</i>	
<u>An Isolated Zeta Converter: Principle of Operation and Design in CCM</u>	43
<i>Pijit Kochcha, Sarawut Sujitjorn</i>	
<u>Scroll Generation with Inductorless Chua's Circuit and Wien Bridge Oscillator</u>	48
<i>Watcharin Jantanate, Peter A. Chaiyasena, Sarawut Sujitjorn</i>	
<u>Dynamic Compensations for Hard Disk Heads</u>	54
<i>Nuapett Sarasiri, Arthit Srikaew, Sarawut Sujitjorn</i>	
<u>Numerical Approach to Lyapunov's Stability Analysis of Nonlinear Systems Using Threshold Accepting Algorithms</u>	58
<i>Suphaphorn Panikhom, Sarawut Sujitjorn</i>	
<u>Performance Improvement of Harmonic Detection using Synchronous Reference Frame Method</u>	62
<i>P. Santiprapan, K-L. Areerak</i>	
<u>Hybrid Compensation for Harmonic and Power Factor in Single-Phase AC Drive</u>	68
<i>Kongpol Areerak, Soupagorn Visawa-phatra-dhanadhorn, Sarawut Sujitjorn</i>	
<u>Parameters Identification of Separately Excited DC Motor using Adaptive Tabu Search Technique</u>	74
<i>S. Udomsuk, K-L. Areerak, K-N. Areerak, A. Srikaew</i>	
<u>Versatile Precision Full-Wave Rectifier Using Current and Voltage Conveyor</u>	79
<i>Jaroslav Koton, Norbert Herencsar, Kamil Vrba, Oguzhan Cicekoglu</i>	

<u>Fully-Differential Universal Filter with Current Active Elements</u>	83
<i>Jan Jerabek, Roman Sotner, Kamil Vrba</i>	
<u>Novel Mixed-Mode KHN-Equivalent Filter using Z-Copy CFTAs and Grounded Capacitors</u>	87
<i>Norbert Herencsar, Jaroslav Koton, Kamil Vrba, Abhirup Lahiri</i>	
<u>Solid-State Fault Current Limiter for Voltage Sag Mitigation and its Parameters Design</u>	91
<i>B. Boribun, T. Kulworawanichpong</i>	
<u>A Survey on the Application of the Elliptical Trigonometry in Industrial Electronic Systems using Controlled Waveforms with Modeling and Simulating of Two Functions Elliptic Mar and Elliptic Jes-x</u>	96
<i>Claude Bayeh</i>	
<u>Depointing Influence of Antenna on the Link Budget at the Reception</u>	109
<i>Mohammed Ali Mebrek, Mohammed Bekhti</i>	
<u>A Linear OTA with Improved Performance in 0.18 Micron</u>	115
<i>Nikhil Raj, R. K. Sharma</i>	
<u>Analysis and Modeling of High Performance and Low Power UTB SGOI Devices Scalable to Sub 30 nm</u>	120
<i>Kiran Bailey, K. S. Gurumurthy</i>	
<u>Granular Load Forecast by Clustering Techniques</u>	124
<i>D. Sica, L. H. Macedo, J. Szczupak, L. Pinto, R. Semolini, M. Inoue</i>	
<u>A 0.4 dB Noise Figure Wideband Low-Noise Amplifier using a Novel InGaAs/InAlAs/InP Device</u>	129
<i>Z. Hamaizia, N. Sengouga, M. Missous, M. C. E. Yagoub</i>	
<u>Fiber Sensor of Temperature Field Disturbance</u>	134
<i>Filip Dvorak, Jan Maschke, Cestmir Vlcek</i>	
<u>Modeling and Predictive Control of Tow Tank System by MLD Approach</u>	140
<i>Y. Hammi, N. Zanzouri, M. Ksouri</i>	
<u>Relationship between Fibonacci and Lucas Sequences and their Application in Symmetric Cryptosystems</u>	146
<i>A. Luma, B. Raufi</i>	
<u>Properties of Activity Index Extended by Higher-Order Moments</u>	151
<i>Damjan Zazula, Rok Istenic</i>	
<u>Bianisotropic Chirality Effect on Asymmetric Chiral Planar Waveguide Modes</u>	158
<i>Abdelbaki Cherouana, Chemseddine Zebiri, Fatiha Benabdelaziz</i>	
<u>Towards an Open Embedded System on Chip for Network Applications</u>	163
<i>F. Abid, N. Izeboudjen, L. Sahli, D. Lazib, S. Titri, F. Louiz, M. Bakiri</i>	
<u>Optimization of FIR Filter Implementation for FMT on VLIW DSP</u>	169
<i>Petr Sysel, Ondrej Krajsa</i>	
<u>Non-Overlapped FMT Modulation in Wireless Networks</u>	174

Plenary Lecture 1

Harmonic Identification Algorithms with Applications

Professor Sarawut Sujitjorn

School of Electrical Engineering, Institute of Engineering
Suranaree University of Technology, Thailand
E-mail: sarawut@sut.ac.th

Abstract: Power quality has become more and more stringent recently due to a widespread use of switching power converters. Such devices produce an excessive amount of harmonics injected into the systems. As a result, current waveforms are distorted, and sometimes undesirable distortion occurs with voltage waveforms. Current harmonics cause an increase in heat and power losses, and a drop in power factor. These reflect an inefficient use of energy. Moreover, excessive harmonics can be harmful to protective devices, and measuring equipments. Harmonic compensations may utilize passive, active, and hybrid filters. With an active power filter (APF), probably in a hybrid form, there is a need for a harmonic identification unit sometimes referred to as a harmonic detector. The lecture will begin with the definitions of power quality, harmonics, voltage-source and current-source nonlinear loads, the need for harmonic elimination, and the corresponding standards. Consequently, a review of existing harmonic identification methods will be given. These include the PQ, the DQ, the SD, and the SWFA methods, respectively. The new harmonic identification methods developed by the speaker and his co-workers will be discussed. These include the DQF, the SVF, and the SVB methods, respectively. Various modes of applications will also be discussed. Extensive simulation results as well as practical ones for 1- and 3-phase systems will be demonstrated.

Brief Biography of the Speaker:

Sarawut Sujitjorn received his PhD in Electronic and Electrical Engineering from the University of Birmingham, UK, in 1987. He is currently a professor of electrical engineering in the School of Electrical Engineering, Suranaree University of Technology, Thailand. He has authored 3 books, and published more than 100 papers in peer reviewed journals and conference proceedings. He also holds 15 patents in electrical, electronic, and mechanical devices. For the last 15 years, he had administered the university in various positions including head of the department, vice rector for academic affairs, and director of the R&D institute. He spends his leisure time with his family, dog, garden, and Thai classical music.
