Preface

This year the 7th WSEAS International Conference on Business Administration (ICBA '13) and the 10th WSEAS International Conference on Mathematical Biology and Ecology (MABE '13) were held in Milan, Italy, January 9-11, 2013. The conferences provided a platform to discuss global business and economics, applied decision sciences, business and globalisation, corporate governance, mathematics in molecular biology, environment and ecosystems, environmental systems, bioengineering, medical imaging, nuclear biology and medicine, computer applications in biology etc with participants from all over the world, both from academia and from industry.

Their success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

The accepted papers of these conferences are published in this Book that will be sent to international indexes. They will be also available in the E-Library of the WSEAS. Extended versions of the best papers will be promoted to many Journals for further evaluation.

Conferences such as these can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.
