Fast-track to innovation

Dear Sir/Madam

**5th WSEAS International Conference on Neural Networks and Applications (NNA'04), Udine,  
Italy, 25-27 March 2004**

We understand that you are the organiser of, or contact for, the above meeting. We are therefore writing to you for information about the papers to be presented at this meeting.

INSPEC, which is part of the Institution of Electrical Engineers, is run on a non-profit basis and is recognised as the leading English-language supplier of services providing access to the published information in the fields of physics, electronics and computing. INSPEC also has significant coverage in the fields of materials science, oceanography, nuclear engineering, geophysics, biomedical engineering and biophysics.

Coverage by INSPEC of the proceedings of the above conference would bring it to the attention of a wide readership of interested scientists, engineers, librarians and information officers.

It would be appreciated therefore if you could supply us with a copy of the proceedings on publication. If this is not possible it would be of great help to us if you could complete the attached sheet and return it to the address indicated.

Thank you

Yours faithfully

Jason Foulsham  
Section Head, Acquisitions  
INSPEC
