**Dr. Niraj Shakhakarmi** has worked as a Doctoral researcher since 2009-2011 in the ARO Center for Battlefield Communications (CeBCom) Research, Department of Electrical and Computer Engineering,

Prairie View A&M University. He received his B.E. degree in Computer Engineering in 2005 and M.Sc. in Information and Communications Engineering in 2007. His research interests are in the areas of Wireless Communications and Networks Security, Secured Position Location & Tracking (PL&T) of Malicious Radios, Cognitive Radio Networks, 3G/4G/Next Generations Networks, Satellite Networks and Digital Signal Processing, Wavelets Applications and Image/Colour Technology. He has published WSEAS and IJCSI journal, Elsevier and ICSST conference. His several journals and conference papers are under review in IEEE transactions. He is serving as reviewer for WSEAS, SAE and editorial board member for IJEECE and IJCN journals.

**Dhadesugoor R. Vaman** is Texas Instrument Endowed Chair Professor and Founding Director of ARO Center for Battlefield Communications (CeBCom) Research, ECE Department, Prairie View A&M University (PVAMU). He has more than 38 years of research experience in telecommunications and networking area. Currently, he has been working on the control based mobile ad hoc and sensor networks with emphasis on achieving bandwidth efficiency using KV transform coding; integrated power control, scheduling and routing in cluster based network architecture; QoS assurance for multi-service applications; and efficient network management.
